

December 15, 1965.

Mr. Robert Dunfield,
Oak Island,
Chester,
Nova Scotia.

Dear Mr. Dunfield:

This is a PS to my letter of yesterday in which I forgot to say that your crane should soon be bringing up evidence of the boxes and casks which fell from the 98 ft. level through the open space below to approximately 150 ft. If coins are found, it would be definite evidence of the truthfulness of the facts alleged by earlier explorers of having gone through casks and boxes of loose metal and, in my opinion, confirm your belief and mine that the treasure should be reached below the 150 ft. level.

You, of course, are sifting all the earth brought up from this lower depth for evidence of this kind. I am following your efforts with great interest.

Again my kindest regards.

Yours sincerely,

Reginald V. Harris.
